

In January 2011, D+H acquired the operations of ASSET Inc. a Canadian industry leader in recovery management solutions. We are delighted to welcome ASSET and its talented team to D+H, and we look forward to continuing to expand our integrated solutions for lenders through the additional capabilities this acquisition provides.

ASSET's recovery management solutions automate, manage and minimize the manual collection processes involved with asset recovery and remarketing, insolvency management, debt collection, and litigation. These solutions are offered in four principal areas:

- 1) Moveable Property Recovery
- 2) Real Property Recovery
- 3) Insolvency Management
- 4) Unsecured Debt Recovery.

All of ASSET's solutions are seamlessly integrated end-to-end product offerings designed to reduce the manual tasks related to the recovery lifecycle of a loan. This flexibility enables lenders to manage both internal processes and external suppliers more intelligently, while simultaneously reducing operational overhead costs, increasing recoveries, meeting challenging compliance demands, reducing risk and mitigating losses at all stages of the recovery lifecycle.

More information about D+H's newest business offering can be found at www.asset.net
